SUMMARY

Java Full Stack Developer with 1.8 years of experience in building scalable enterprise applications using Java, Spring Boot, Hibernate, React.js, and RESTful APIs. Proficient in backend development, microservices-based application design, secure authentication using JWT and Spring Security, and enterprise data integration using Apache NiFi. Skilled in PostgreSQL, MySQL, and Oracle Database, with hands-on experience in developing high-performance backend services, database-driven applications, and workflow automation solutions. Experienced in unit testing using Mockito and Jest, with strong problem-solving skills demonstrated through solving 500+ DSA problems across multiple coding platforms. Passionate about developing secure, scalable, and maintainable applications in Agile development environments.

PROFESSIONAL EXPERIENCE

Associate Software Developer , IQGateway Pvt Ltd, Bangalore **April 2025 – Present**

- Developed React.js modules integrated with Spring Boot RESTful APIs and Apache NiFi workflows for enterprise migration and cross-database integration.
- Built scalable backend services and microservices-based APIs using Java and Spring Boot for high-performance enterprise applications.
- Implemented database mapping, validation, and error-handling workflows to ensure reliable enterprise data processing.
- Achieved 80% test coverage using Mockito and Jest through CI/CD pipeline validation, reducing regression issues and improving application reliability.
- Implemented JWT and Spring Security-based authentication and authorization for secure API communication and protected access control.
- Maintained 90%+ code quality standards using SonarQube, code reviews, and debugging best practices in Agile environments.
- Collaborated with CI/CD workflows for automated build validation, code integration, and deployment activities.
- Developed AI-powered automation solutions using the Agno framework and LLM integrations to streamline workflow execution.

Java Full Stack Developer Intern, TAP Academy, Bangalore **Sept 2023 – Mar 2024**

- Developed full-stack web applications using Java, J2EE, Spring, Hibernate, MySQL, React.js, HTML, CSS, and JavaScript.
- Built RESTful APIs and integrated backend services with MySQL using JDBC and Hibernate for scalable application workflows.
- Implemented backend functionalities using Core Java concepts including OOP, Collections, Multithreading, Exception Handling, and Java 8 features.
- Developed responsive frontend interfaces and integrated backend services for seamless user experience and efficient data flow.
- Built a capstone Online Food Delivery application with authentication, order management, database integration, and responsive UI functionality.

EDUCATION

Master of Computer Applications (MCA) | CGPA: 8.0 **Aug 2022 – Mar 2024**
Acharya Nagarjuna University, Guntur

TECHNICAL SKILLS

- **Programming Languages:** Java, JavaScript, SQL
- **Frontend Technologies:** React.js, HTML5, CSS3
- **Backend Technologies:** Spring Boot, Spring MVC, Hibernate, JDBC, J2EE, Microservices
- **Databases:** PostgreSQL, MySQL, Oracle Database, MongoDB (Basics)
- **API & Integration Tools:** RESTful APIs, Postman, Swagger, Apache NiFi
- **Authentication & Security:** JWT, Spring Security
- **Testing & CI/CD:** Mockito, Jest, CI/CD Pipeline Workflows, Docker
- **DevOps & Code Quality:** Git, SonarQube
- **Project & Development Tools:** Jira, Taiga, IntelliJ IDEA, Eclipse, VS Code
- **Core Java Concepts:** OOP, Multithreading, Collections Framework, Java 8

PROJECTS

- **Data Migration Management System | React.js, Apache NiFi, MySQL, PostgreSQL**

Developed an enterprise-grade Data Migration Management System using React.js, Spring Boot, Apache NiFi, MySQL, and PostgreSQL to automate cross-database migration workflows. Built custom frontend modules integrated with Spring Boot REST APIs and Apache NiFi workflows for migration execution and monitoring. Designed and configured Apache NiFi processors, processor groups, controller services, and data flow pipelines to manage source-to-target database mapping, validation, transformation, and reliable data migration operations between MySQL and PostgreSQL databases.

- **Claim Processing System | Java, Spring Boot, RESTful APIs, MySQL**

Developed a Claim Processing System to automate insurance claim workflows, including policy validation, claim processing, approval workflows, customer management, and claim status tracking.

- **Hospital Management System | Spring Boot, React.js, MySQL**

Developed a Hospital Management System to manage OPD workflows, including patient registration, appointment scheduling, doctor consultations, prescription management, billing, and payment processing administration workflows.

CERTIFICATIONS

- **Java Full Stack Development Certification** – TAP Academy
- **Java (Basic) Certification** – HackerRank
- **Coding Hackathon Participation Certificate** – College Level Competition

ACHIEVEMENTS

- Awarded a Top 4.2% ranking for consistently solving programming problems for 100+ consecutive days in 2024 on LeetCode.
- Solved 500+ Data Structures and Algorithms (DSA) problems across coding platforms including LeetCode, GeeksforGeeks, HackerRank, and Coding Ninjas.
